Summary

I make the funny little guys on the screen do stuff, and the tools that make it happen!

I'm a game programming student driven by curiosity and a love for enabling others to create. My background in management, teaching, and research-driven development has shaped an analytical mindset I use to refine gameplay and empower teams.

Experience

Game Programming Intern, *Filimundus AB*

Jan 2023 - May 2023 | Stockholm

- Developed features and systems for the mobile Game *Pettson's Inventions 4*.
- Managed game builds and deployment for *Android* and *iOS* for multiple games.
- Maintained, refactored and expanded upon legacy code.

Projects

Tower Builder & Validator, C++/Custom Engine

Mar 2026 - Apr 2026

- Implemented a building system using my immediate mode geometry tool, with grid-based block placement.
- Created a rule validation system with 9 different rules and error highlighting.

FPS Character Controller in ECS Architecture,

C++/Custom Engine/PhysX

Dec 2025 - Apr 2026

- Implemented character controller with physics based movement.
- Designed reusable *ECS* systems and components for callbacks, health and other gameplay logic.
- Created Weapon System with 3 firing modes and data-driven parameters.

Moose Lost in the Woods, C#/Unity/FMOD

Mar 2023 - Jun 2023

- Programmed a 3D platforming character controller with coyote time and jump buffering.
- Responsible for UI/Menu functionality, and audio integration using *FMOD*.
- Added accessibility features such as an assistive camera and adaptive button graphics.
- Managed a team of 8.

Education

The Game Assembly, Higher Vocational Education Diploma | Game Programming Generalist

Aug 2024 - Present | Stockholm

- 3 Game projects in custom C++ engine.
- 2 Game projects in in-house engine.
- 2 Game projects in *Unity*.
- Tool Development | AI Programming, Scripting | Network Programming | Graphics Programming | Data structures and algorithms | Linear Algebra.

Södertörn University, Bachelor of Science in Media Technology | Game Design and Scripting

Aug 2021 - Jun 2024 | Stockholm

- 3 Game projects in *Unity*.
- Bachelor's thesis in AI companion design.
- Game Design Analysis | Analog Game Design | Game Research | Project management | Game Marketing | Level Design | Narrative Design.
