Summary

I make the funny little guys on the screen do stuff, and the tools that make it happen!
I'm a game programming student driven by curiosity and a love for enabling others to create.
My background in management, teaching, and research-driven development has shaped an analytical mindset I use to refine gameplay and empower teams.

Experience

Game Programming Intern, *Filimundus AB*
Jan 2023 - May 2023 | Stockholm

- Developed features and systems for the mobile Game *Pettson's Inventions 4*.
- Managed game builds and deployment for *Android* and *iOS* for multiple games.
- Maintained, refactored and expanded upon legacy code.

Projects

FPS Character Controller in ECS Architecture, *C++/Custom Engine/PhysX*
Dec 2025 - Apr 2026

- Implemented character controller with advanced physics based movement.
- Designed reusable ECS systems and components for callbacks, health and other gameplay logic.
- Created Weapon System with 3 firing modes and data-driven parameters.

Rule Engine/Validator, *C++/Custom Engine*
Feb 2026 - Apr 2026

- Implemented a building system using my Immediate Mode Geometry tool, with grid-based block placement and modular construction.
- Enabled designers to define data-driven rules, e.g., "Every floor must have at least one balcony," and a rule-validation system.

Moose Lost in the Woods, *C#/Unity/FMOD*
Mar 2023 - Jun 2023

- Programmed a 3D platforming character controller with coyote time and jump buffering.
- Responsible for UI/Menu functionality, and audio integration using FMOD.
- Added accessibility features such as an assistive camera and adaptive button graphics.
- Managed a team of 8.

Education

The Game Assembly, *Higher Vocational Education Diploma | Game Programming Generalist*
Aug 2024 - Present | Stockholm

- 3 Game projects in custom C++ engine.
- 2 Game projects in in-house engine.
- 2 Game projects in *Unity*.
- Tool Development | AI Programming, Scripting | Network Programming | Graphics Programming | Data structures and algorithms | Linear Algebra.

Södertörn University, *Bachelor of Science in Media Technology | Game Design and Scripting*
Aug 2021 - Jun 2024 | Stockholm

- 3 Game projects in *Unity*.
- Bachelor's thesis in AI companion design.
- Game Design Analysis | Analog Game Design | Game Research | Project management | Game Marketing | Level Design | Narrative Design.

Languages/Software

C++ | C# | GDScript | HTML | CSS | Unity | Godot | FMOD | Dx11 | PhysX | Perforce (P4) | Git | Jira | YouTrack

Skills

Agile Development, Project Management, Documentation, Interpersonal Skills.

Achievements

Gamer's Choice Winner
Moose Lost in the Woods
Sweden Game Awards 2023

Best Narrative Winner
Moose Lost in the Woods
Sweden Game Awards 2023
