Summary

I make the little guys on the screen do stuff!

I'm a game programming student with a natural curiosity about most things. This drives me to keep learning, no matter how obscure the topic.

I'm mostly drawn to gameplay programming because I enjoy figuring out the little details that make a game feel great. But, I also really enjoy tool development and finding ways to make other developers' work easier.

Experience

Game Programming Intern, *Head First Studios*
Aug 2026 - Present | Remote

- Created Physics based Tower Defense project utilizing *Unity DOTS* and *Unity's Job system* as part of onboarding.
- Developed designer facing Level Event Sequencing tool using *Unity's Graph Toolkit*.

Game Programming Intern, *Filimundus AB*
Jan 2023 - May 2023 | Stockholm

- Developed data-driven cutscene creation tool, swipe and zoom HUB navigation, save and progression system, and drag 'n' drop dress-up minigame for the mobile game *Pettson's Inventions 4*.
- Managed game builds and deployment for *Android* and *iOS* for multiple games.
- Maintained, refactored, and expanded upon legacy code.

Projects

Arcade Motorcycle Controller in ECS Architecture, *C++/Custom Engine/PhysX*
Apr 2026 - Jun 2026

- Physics-based vehicle controller with acceleration, braking, drifting, boosting and more...
- Variable motorcycle stats altering driving physics such as handling.
- Motorcycle customization affecting both appearance and stats.

Tower Builder & Validator, *C++/Custom Engine*
Mar 2026 - Apr 2026

- Building system using my immediate mode geometry tool, with grid-based block placement.
- Rule validation system with 9 different rules and error highlighting.

Education

The Game Assembly, *Higher Vocational Education Diploma | Game Programming Generalist*
Aug 2024 - Present | Stockholm

- 3 Game projects in *custom C++ engine*.
- 2 Game projects in *in-house engine*.
- 2 Game projects in *Unity*.
- Tool Development | AI Programming, Scripting | Network Programming | Graphics Programming | Data structures and algorithms | Linear Algebra.

Södertörn University, *Bachelor of Science in Media Technology | Game Design and Scripting*
Aug 2021 - Jun 2024 | Stockholm

- 3 Game projects in *Unity*.
- Bachelor's thesis in AI companion design.
- Game Design Analysis | Analog Game Design | Game Research | Project management | Game Marketing | Level Design | Narrative Design.

Software/Skills

C++ | C# | GDScript | HTML | CSS | Unity | Godot | FMOD | Dx11 | PhysX | nlohmann JSON | Dear ImGui | Unity Version Control | Perforce (P4) | Git & Github | Scrum | Agile Develpoment

Achievements

Gamer's Choice Winner
Moose Lost in the Woods
Swedish Game Awards 2023

Best Narrative Winner
Moose Lost in the Woods
Swedish Game Awards 2023
